Issue 01 : Rev No. 1 : Dt. 01/07/18

FF No.: 654

### **COURSE CODE: CS2218**

### COURSE NAME: OBJECT ORIENTED PROGRAMMING

### **Course Prerequisites:**

Basic course on programming

# **Course Objectives:**

- 1. Understand Object Oriented programming concepts
- 2. Demonstrate Object Oriented programming concepts by writing suitable Java programs
- 3. Model a given computational problem in Object Oriented fashion
- 4. To develop problem solving ability using Object Oriented programming constructs like multithreading
- 5. Develop effective solutions using for real world problems using the concepts such as file handling and GUI
- 6. Implement applications using Java I/O and event-based GUI handling principles

7.

Credits: 5 Teaching Scheme Theory: 3 Hours/Week

Tut: 1 Hours/Week Lab: 2 Hours/Week

# **Course Relevance:**

This is an important course for engineering students. It develops computational problem solving and logic building capability of students. Acquiring programming skills has a high relevance in all branches of Engineering. Once the student gains expertise in coding, this course proves to be beneficial to them to excel in industry demanding coding in specific software.

#### **SECTION-1**

#### **Introduction:**

What is Object Oriented Programming (OOP)? The need of OOP, Characteristics of OOP.

**Java overview**: Classes and Objects, Java object storage, Different ways to create objects in Java, Access Modifiers, this reference, main method, Static vs Instance block, Static methods vs Instance methods in Java, Object class, Static class in Java, operators, keywords in java.

**Constructors:** Constructors in Java, Default constructor, Parameterized constructor, Copy Constructor, Private Constructors and Singleton Classes. **Garbage Collection:** Garbage Collection, How to make object eligible for garbage collection in Java?

**Input and Output:** Byte Stream vs Character Stream, Command Line arguments, use of Scanner Class, Scanner vs BufferReader Class, Formatted output, Reading input from console.

**Arrays in Java:** Arrays in Java, initialization, Default Array values, multi dimensional array, passing array to a function, Jagged arrays, java.util.Arrays class, string class, string buffer, string builder.

**Methods in Java:** Methods, Parameters passing, Returning Multiple values, Throwable fillInStackTrace() method in Java, Valid variants of main(), Variable Arguments (Varargs) method

**Inheritance:** Inheritance in Java, Types, Constructor in Inheritance, Using final with Inheritance, Accessing superclass member, Override private methods, Parent and Child classes having same data member, Base vs derived class reference. Polymorphism: Method Overloading, Overloading main(), Static vs Dynamic Binding, Method Hiding. Private and final methods, Passing and Returning Objects in Java

#### **SECTION-2**

**Exception Handling:** Exceptions, types, types of handling exception, Checked vs Unchecked Exceptions, Throw and Throws, User-defined Exception, Chained Exceptions.

**Interfaces and Abstract Classes:** Interface and its usage, Abstract Class and its usage, Difference between Abstract Class and Interface, Nested Interface, Nested Class, Inner class, Anonymous Inner class, Marker interface.

Java Packages: Packages Introduction, default access specifier use, dealing with package.

**Collection in Java:** Collections Class, Enumeration, Iterators and ListIterator, Using Iterators, Iterator vs Foreach, ArrayList, Vector, Map, Set.

**Multithreading:** Thread life Cycle, Thread Priority, Thread Methods, Inter-thread Communication, Synchronization, Method and Block Synchronization, Deadlock situation in threading.

**File Handling & Database connectivity:** File Processing, Primitive Data Processing, Object Data Processing, Wrapper classes, Connecting Java with database (JDBC/ODBC).

**Java GUI**: AWT, Swing, Components, design patterns. Layout Manager: Flow, Border, Grid and Card. Label, Button, Choice, List, Event Handling (mouse, key), Menus, Tables

### **List of Course Seminar Topics:**

- 1. Introduction of Arrays and 1D Array programming examples
- 2. Multidimensional arrays
- 3. Variants of main() and command line arguments
- 4. Input and Output stream classes
- 5. String concepts and various methods of compairing strings
- 6. Methods in Java
- 7. Java String Methods
- 8. Passing array to a function and Jagged array examples
- 9. Reading input using Scanner and BufferReader Class
- 10. String, String buffer and String builder
- 11. Types of Inheritance in Java
- 12. Implementation of Types using Constructor in Inheritance
- 13. Using final with Inheritance
- 14. Base vs derived class reference in Inheritance
- 15. Using final with Inheritance, Accessing superclass member
- 16. Parent and Child classes having same data member
- 17. Overriding, Hiding Fields & Methods
- 18. Static vs Dynamic Binding & Hiding Methods
- 19. Private and final methods
- 20. Passing and Returning Objects in Java
- 21. Java Memory Management
- 22. File handling in Java vs C++
- 23. Data types used in Java vs C++
- 24. Java Object Serialization and Deserialization
- 25. Operator precedence
- 26. Use of Object Class Methods
- 27. Garbage collection in JAVA
- 28. Use of Static Blocks in various applications
- 29. Keywords used in JAVA
- 30. Types of Variables In JAVA

### **List of Group Discussion Topics:**

- 1. Checked and unchecked exception, user defined and standard exception
- 2. Abstraction in Java and different ways to achieve Abstraction
- 3. Packages in Java Types, Advantages & Techniques to Access Packages
- 4. Inner classes, nested interfaces in Java
- 5. Difference between Interfaces and abstract classes in Java
- 6. Exception Handling in Java Vs CPP
- 7. Difference between 1) throw and throws. 2) Final, finally and finalize in Java
- 8. Discuss Exception propagation and Discuss Exception handling with method overriding in Java
- 9. Discuss Packages, Access specifiers and Encapsulation in java.
- 10. Difference between abstraction and encapsulation in Java.
- 11. Daemon Threads Vs user threads
- 12. Preemptive scheduling Vs slicing
- 13. Is it possible to call the run()method directly to start a new thread? pls comment
- 14. Arraylist Vs Vector
- 15. Arrays Vs Collections
- 16. is Iterator a class or an Interface? what is its use?
- 17. List Vs Set
- 18. BufferedWriter and BufferedReader classes in java
- 19. BufferedReader Vs Scanner class in java
- 20. Buffered Reader Vs FileReader in java
- 21. Instanceofjava
- 22. Difference between CPP and JAVA
- 23. Difference between JDBC and ODBC connectivity
- 24. file processing in java
- 25. Difference between premitive data processing and object data processing
- 26. Creating GUI using swing
- 27. comparision between Swing, SWT, AWT, SwingX, JGoodies, JavaFX, Apache Pivot
- 28. Introduction To JFC And GUI Programming In Java
- 29. Introduction to wrapper classes
- 30. Why java uses Unicode System?

#### **List of Practicals:**

- 1. Implement Student class using following Concepts
  - All types of Constructors
  - Static variables and instance variables
  - Static blocks and instance blocks
  - Static methods and instance methods

2. There is a class Adder which has two data members of type 1D int array and int variable. It has two functions: getdata and numsum. Function getdata accepts non-empty array of distinct integers from user in 1D int array data member and a targetsum in another data member. The function numsum adds any two elements from an input array which is equal to targetsum and return an array of resulting two elements, in any order. If no two numbers sum up to the target sum, the function should return an empty array. Note that the target sum is to be obtained by summing two different integers in the array; you can't add a single integer to itself in order to obtain the target sum. You can assume that there will be at most one pair of numbers summing up to the target sum. Use constructor. Use extra variables if needed

Input:

Array=[3,5,-4,8,11,1,-1,7] targetsum=15

Output: [8,7]

Input:

Array=[3,5,-4,8,11,1,-1,6] targetsum=15

Output: []

- 3. Write Java program to calculate area of triangle, square & circle using function overloading. Function parameter accept from user (Use function Overloading concepts and Inheritance).
- 4. Write a program for following exception, develop a suitable scenario in which the following exceptions occur:
  - a. divide by zero
  - b. Array index out of bounds exception
  - c. Null pointer Exception
- 5. Write a java program to solve producer-consumer problem where there are two producer threads and one consumer thread.
- 6. Implement various operations using JDBC Connectivity.
- 7. Display bank account information (Use interface and inheritance using java)
- **8.** Develop a GUI in java which reads, update the file.

### **List of Course Projects:**

Topics of Course Project would be discussed in Lab session.

## **List of Home Assignments:**

#### **Blog:**

- 1. Single and Multidimensional arrays in Java
- 2. Comparison Inheritance & Polymorphism
- 3. Need of abstract classes and interfaces in Java
- 4. Multithreading concept in Java
- 5. Signed & Unsigned arithmetic operations usin JAVA
- 6. Role of start() and run() methods in multithreading

### **Survey:**

- 1. Strategies for Migration from C++ to Java
- 2. Product development using Inheritance and Polymorphism in Industry
- 3. on Java/OOP features popular amongst developers
- 4. Which other (non-JVM) languages does your application use?
- 5. How Java Impacted the Internet
- 6. How can a ArrayList be synchronised without using vector?

### **Design:**

- 1. Implementation of Singleton design pattern in Java
- 2. Notes Repository System for Academic
- 3. Design for employee management system
- 4. Design for student management system
- 5. Inventory Management System
- 6. Write a program to delete duplicate numbers from the file

### **Case Study:**

- 1. Java development milestones from 1.0 to 16.0
- 2. Implementation of Different Methods in Polymorphism
- 3. Real world systems which use java for its implementation
- 4. Drawing a flag using java
- 5. Use of different methods of Class object
- 6. Drawing a flag using java

#### **Assessment Scheme:**

Mid Semester Examination - 10 Marks

Presentation - 15 Marks

Laboratory - 10 Marks

Course Project - 10 Marks

Home Assignment - 10 Marks

Group Discussion - 15 Marks

End Semester Examination - 10 Marks

Comprehensive Viva Voce - 20 Marks

### **Text Books:**

Herbert Schildt, "JAVA- The Complete Reference", , 11th Edition, McGraw Hill Education

### **Reference Books:**

- 1. Bruce Eckel, "Thinking In Java The Definitive Introduction to Object-Oriented Programming in the Language of the World-Wide Web", Fourth Edition, Pearson Education, Inc.
- 2. R. Morelli and R. Walde, "Java, java, Java Object-Oriented Problem Solving",  $3^{rd}$  edition, Pearson Education, Inc.

# Moocs Links and additional reading material:

Programming using Java Java Tutorial | By Infosys Technology https://infyspringboard.onwingspan.com/en/app/toc/lex\_auth\_01304972186110361645\_shared/overview

An Introduction to Programming through C++ – Prof A.G. Ranade- NPTEL- computer science and engineering – NOC https://nptel.ac.in/courses/106/101/106101208/#

#### **Course Outcomes:**

The student will be able to –

- 1. Understand object-oriented programming features
- 2. Develop real world applications using class, inheritance and polymorphism
- 3. Adapt Best Practices of Class Design by using Standard Templates Library
- 4. Solve computing problems by applying the knowledge of Exception handling and Multithreading
- 5. Design solutions by choosing suitable data structures such as Array, Vector, Map etc
- 6. Implement applications using Java I/O and event-based GUI handling principles

# **Future Courses Mapping:**

Advanced Data Structures, Advanced Java, Spring Frame Work, Grails Frame Work

# Job Mapping:

Java Programmer, Application Developer, Design Engineer, Senior Software Developer
